Vinayak P Gangaramnavar

Frontend Developer

gangaramanavar@gmail.com +91 8310168918 linkedin.com/in/vinayak-p-gangaramanavar vinayakpg.netlify.app
Bangalore, India

Summary

Results-oriented Frontend Developer with 3+ years of experience engineering scalable, high-performance web applications using Vue.js, React.js, and TypeScript. Proven track record in architecting micro-frontend systems, driving significant Core Web Vitals improvements, and integrating AI-driven capabilities into global platforms serving 18+ countries. Adept at system design, robust state management, and optimizing full-stack performance to align with critical business metrics.

Technical Skills

- **Frontend Frameworks:** Vue.js, React.js, Nuxt.js, Next.js, HTML5, SCSS, CSS3, JavaScript (ES6+), TypeScript
- **UI/UX & Build Tools:** Tailwind CSS, Vuetify, Bootstrap, Material UI, Figma, GSAP, Vite, Webpack, Git, CI/CD
- **State Management:** Pinia, Vuex, Zustand, Context API
- **Backend & APIs:** Node.js, REST APIs, GraphQL, Django Rest Framework, PostgreSQL, MongoDB
- **Architecture & AI:** AI/LLM Integration, System Design, Micro Frontends, Core Web Vitals, SEO, SSR

Professional Experience

Senior Web Developer - AI and Web *May 2023 – Present*
Luxeveda *Bangalore, India*

- **AI-Driven Web Architecture:** Engineered and deployed high-performance web applications, seamlessly integrating LLM capabilities and machine learning APIs into responsive frontend architectures.
- **Complex State Management:** Architected scalable interfaces using React.js/Vue.js and TypeScript, optimizing data flow and state management between complex AI backend microservices and the client.
- **Deployment & Optimization:** Streamlined CI/CD pipelines for AI web tool integrations, ensuring zero-downtime updates and maintaining rapid cross-device rendering speeds.

Frontend Developer *Mar 2023 – Present*
Luxeveda *Bangalore, India*

- **Global Platform Architecture:** Spearheaded frontend development of Dabur International's web platform (daburinternational.com), implementing scalable i18n architectures for 18 global markets.
- **Performance Optimization:** Redesigned the UI and overhauled the rendering pipeline, surging Core Web Vitals scores from 38 to 85+ within a 6-month period.
- **Framework Migration:** Architected Nuxt migration from 3.11 to 4.4, optimizing SSR hydration and route-level caching to slash initial page load times by 1.2 seconds.
- **PWA & Engagement:** Integrated PWA capabilities and FCM push notifications with custom service worker delivery, achieving a 96% reliable delivery rate.
- **Micro-Frontend Integration:** Led Project Sphere to modularize the user onboarding journey, isolating dependencies and streamlining CI/CD deployment pipelines.
- **Backend Modules:** Built backend flows using Django Rest Framework and optimized Node.js/MongoDB APIs with pagination and ZIP-radius logic to drastically reduce query latency.

Projects

- **Praan (praan.io):** Developed high-performance, responsive web interfaces for a deep-tech climate platform. Optimized interactive data visualizations for cross-device rendering.
- **Beretta Gallery USA (berettagalleryusa.com):** Engineered luxury e-commerce frontend components, optimizing product catalog navigation and media rendering pipelines.
- **45R USA (shop45rusa.com):** Developed high-converting e-commerce storefront interfaces featuring modular UI layouts, fluid interaction workflows, and optimized load speeds.
- **Pioxazon (pioxazon.piindustries.com):** Built an enterprise portal for PI Industries, engineering a modular Vue.js and Tailwind layout system to streamline internal asset management.

Education

Bachelor of Engineering *Aug 2018 – May 2022*
Don Bosco Institute of Technology, Bangalore
